

India Stock Selector - 31-Dec-2022

Point-in-time opportunity scan | MakroGraph Intelligence | Supply-Demand Theme Engine v3

As-of: **31-Dec-2022** Country: **India (NSE/BSE)** Major themes: **15** Emerging themes: **15** Candidates ranked: **42** Selection snapshot: **31-Dec-2022**

FLAT_MIXED - 56% of large-caps above 200DMA | avg 3m return +5.4% Mixed breadth (56% above 200DMA, +5.4% avg 3m). In flat markets, selector alpha is entirely theme-dependent: +43% alpha in 2023 (T&D/defence supercycle active), -6% alpha in 2024 (no sector tailwind, governance blowups). Verify theme execution evidence before sizing up.

AS-OF DECISION - THE ONLY SECTION WITH POSITION AUTHORITY

The report date is the decision date. An investment-committee candidate needs an A/B *measured physical-quality* constraint, fresh product-specific operating-maker proof, focused exposure, order-book evidence, and no high-risk disclosure. Mapper corroboration without that strict evidence may enter analyst underwriting, never a Buy-style result. UNMEASURED means physical scarcity was not captured in the as-of reference data; it is not a weak-quality verdict, but it has no position authority in the physical-constraint lane. Early/Timing candidates require an A/B measured constraint, a dated exact operating-maker role, and an as-of order-book or repeated-capex catalyst; they are capped starters after normal risk/valuation underwriting until their stated confirmation. Market regime adjusts position size and staging, never eligibility or constraint quality. Raw scores only order names after a lane's evidence gates clear.

Position authority - do not infer an action from any other report section

The decision card displays every state, but only IC_HANDOFF and CONDITIONAL_STARTER can progress to an investing workflow. IC_HANDOFF still requires normal investment-committee, valuation, and entry review. CONDITIONAL_STARTER permits only a limited starter after valuation/entry review and a written confirmation/exit plan. UNDERWRITE, RESEARCH_ONLY, producer universes, policy, PLI, discovery, and raw-screen sections have no position authority.

Constraint-detection coverage: 13 chains reviewed; 7 came from dated capacity/import/ledger references; 1 need an exact listed-company supplier map. The detector unions mapper products with dated capacity/import references and reviewed exact-chain ledger aliases. Reference-only chains are displayed for research coverage but cannot create a stock decision until an exact listed-company producer mapping is recovered.

RAW RANK	STOCK	CONSTRAINT	DECISION STATE	WHAT IS PERMITTED NOW	EXACT NEXT GATE
#1	TATAPOWER Tata Power Company Limited	Battery Cell (Li-ion), Power Transformer, Solar Cell, Solar Module, Solar Wafer	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	constraint lacks an A/B measured physical-quality grade; unmeasured or weak physical constraints remain research-only; company role not corroborated by as-of maker evidence; at least one mapped product failed own-filing corroboration; multi-chain exposure is too diluted for an early-constraint Buy; no as-of order-book evidence for a corroborated constraint product
#2	ADANIGREEN Adani Green Energy Limited	Power Transformer, Solar Cell, Solar Module, Solar Wafer	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	constraint lacks an A/B measured physical-quality grade; unmeasured or weak physical constraints remain research-only; company role not corroborated by as-of maker evidence; at least one mapped product failed own-filing corroboration; multi-chain exposure is too diluted for an early-constraint Buy; no as-of order-book evidence for a corroborated constraint product
#3	GPIL Godawari Power And Ispat limited	Solar Cell, Solar Module, Solar Wafer	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	constraint lacks an A/B measured physical-quality grade; unmeasured or weak physical constraints remain research-only; company role not corroborated by as-of maker evidence; at least one mapped product failed own-filing corroboration; multi-chain exposure is too diluted for an early-constraint Buy; no as-of order-book evidence for a corroborated constraint product
#4	GVT&D GE Vernova T&D India Limited	CRGO Steel, Defense electronics, Power Transformer	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	constraint lacks an A/B measured physical-quality grade; unmeasured or weak physical constraints remain research-only; company role not corroborated by as-of maker evidence; at least one mapped product failed own-filing corroboration; multi-chain exposure is too diluted for an early-constraint Buy; no as-of order-book evidence for a corroborated constraint product
#5	POWERINDIA Hitachi Energy India Limited	CRGO Steel, EMS / Contract Manufacturing, PCB / Printed Circuit Board, Power Transformer, Rolling Stock / Locomotives, Solar Cell, Solar Module, Solar Wafer	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	constraint lacks an A/B measured physical-quality grade; unmeasured or weak physical constraints remain research-only; company role not corroborated by as-of maker evidence; at least one mapped product failed own-filing corroboration; multi-chain exposure is too diluted for an early-constraint Buy; no as-of order-book evidence for a corroborated constraint product

#6	BEL Bharat Electronics Limited	Defense electronics, Rolling Stock / Locomotives, Solar Cell, Solar Module, Solar Wafer	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	constraint lacks an A/B measured physical-quality grade; unmeasured or weak physical constraints remain research-only; company role not corroborated by as-of maker evidence; at least one mapped product failed own-filing corroboration; multi-chain exposure is too diluted for an early-constraint Buy; no as-of order-book evidence for a corroborated constraint product
#7	GENUSPOWER Genus Power Infrastructures Limited	CRGO Steel, PCB / Printed Circuit Board, Power Transformer	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	constraint lacks an A/B measured physical-quality grade; unmeasured or weak physical constraints remain research-only; company role not corroborated by as-of maker evidence; at least one mapped product failed own-filing corroboration; multi-chain exposure is too diluted for an early-constraint Buy; no as-of order-book evidence for a corroborated constraint product
#8	SWELECTES Swelect Energy Systems Limited	Solar Cell, Solar Module, Solar Wafer	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	constraint lacks an A/B measured physical-quality grade; unmeasured or weak physical constraints remain research-only; company role not corroborated by as-of maker evidence; at least one mapped product failed own-filing corroboration; multi-chain exposure is too diluted for an early-constraint Buy; no as-of order-book evidence for a corroborated constraint product
#9	WEBELSOLAR Websol Energy System Limited	Solar Cell, Solar Module, Solar Wafer	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	constraint lacks an A/B measured physical-quality grade; unmeasured or weak physical constraints remain research-only; company role not corroborated by as-of maker evidence; at least one mapped product failed own-filing corroboration; multi-chain exposure is too diluted for an early-constraint Buy; no as-of order-book evidence for a corroborated constraint product
#10	HFCL HFCL Limited	Optical Fiber Cable	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	no as-of constraint evidence; at least one mapped product failed own-filing corroboration; no as-of order-book evidence for a corroborated constraint product
#11	TDPOWERSYS TD Power Systems Limited	Power Transformer, Rolling Stock / Locomotives	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	no as-of constraint evidence; at least one mapped product failed own-filing corroboration; multi-chain exposure is too diluted for an early-constraint Buy; no as-of order-book evidence for a corroborated constraint product
#12	HAL Hindustan Aeronautics Limited	Defense electronics	RESEARCH ONLY DO NOT BUY FROM THIS LIST	NO POSITION - raw-screen association has no investment authority	no as-of constraint evidence; no as-of order-book evidence for a corroborated constraint product

RESEARCH ONLY 30 additional raw-screen names are not shown here; each is marked with its evidence-gate status in the raw candidate diagnostics and has no position authority.

Constraint-to-company decision map

The producer universe is separated from the investable action. A verified producer, pipeline lead, or mapper match is not a Buy unless the named stock state above says so.

CONSTRAINT / THEME	CONSTRAINT STATE	CORRESPONDING COMPANIES	WHAT IS PERMITTED NOW	EXACT NEXT PROOF
Electronic components (broad import exposure) Electronic components (broad import exposure) - Physical Constraint - physical quality MEASURED - current as of run date - research priority 30	MAP COMPANIES	No exact producer/company linkage recovered	no position - a physical chain was detected before an exact listed-company supplier universe	recover and corroborate exact listed producers, then test product-level earnings capture

----------------------------	--	--	---	---	---

No company clears the strict investment-committee evidence hand-off. This does not erase earlier opportunities: underwriting research and qualifying Early/Timing candidates are evaluated separately below. The report never converts an unverified mapped association into an investment recommendation.

Emerging policy research leads - not a Buy

These are company-owned, dated policy disclosures that the constraint mapper may not yet cover. They are intentionally shown for analyst research, but policy activity cannot establish product exposure, earnings capture, or an investment recommendation by itself.

TICKER	POLICY SIGNAL	AS-OF EVIDENCE	REQUIRED BEFORE ANY BUY
HFCL present in raw screen	PLI company commitment-stage policy disclosure	7 recent company filing(s); 7 commitment-stage disclosure(s) first seen 10-May-2021	verify exact company product/capacity or order evidence, then link it to a demand constraint
GENUSPOWER present in raw screen	RDSS company commitment-stage policy disclosure	4 recent company filing(s); 1 commitment-stage disclosure(s) first seen 30-Jul-2021	verify exact company product/capacity or order evidence, then link it to a demand constraint
TATAPOWER present in raw screen	PM-KUSUM company commitment-stage policy disclosure	2 recent company filing(s); 1 commitment-stage disclosure(s) first seen 09-Feb-2022	verify exact company product/capacity or order evidence, then link it to a demand constraint
ASTRAMICRO present in raw screen	Defence iDEX/Make rising company policy disclosure intensity	3 recent company filing(s) first seen 29-Jan-2022	verify exact company product/capacity or order evidence, then link it to a demand constraint

Policy-led deployment company leads - research only

A company policy disclosure can precede a demand wave, but it does not prove the cited product, award conversion, or earnings capture.

TICKER	ECONOMIC MECHANISM	WHY RESEARCH NOW	REQUIRED BEFORE ANY BUY
TATAPOWER corroborated direct/critical supply-side role	PM-KUSUM POLICY_LED_DEPLOYMENT_DEMAND	as-of order-book evidence; 20 mapped company-capex signals verify demand programme terms, product linkage, award/order conversion, and delivery capacity	exact policy-action-to-product linkage in a dated source; product-level revenue, margin, or order-conversion evidence
GVT&D corroborated direct/critical supply-side role	RDSS POLICY_LED_DEPLOYMENT_DEMAND	as-of order-book evidence; 18 mapped company-capex signals verify demand programme terms, product linkage, award/order conversion, and delivery capacity	exact policy-action-to-product linkage in a dated source; product-level revenue, margin, or order-conversion evidence

GENUSPOWER corroborated direct/critical supply-side role	RDSS POLICY_LED_DEPLOYMENT_DEMAND	as-of order-book evidence; 8 mapped company-capex signals verify demand programme terms, product linkage, award/order conversion, and delivery capacity	exact policy-action-to-product linkage in a dated source; product-level revenue, margin, or order-conversion evidence

POLICY EVIDENCE THAT CHANGES A SELECTED CONSTRAINT

As of 31-Dec-2022: every visible row has a dated company filing, an exact product phrase in the same policy/action disclosure, a stated policy stage, and a specific next research route. A policy mention is not an award; an award is not capacity; capacity is not an investable stock. The table is separate from the final Buy decision. 33 raw discovery matches were screened; 1 mention-only or repetitive-evidence rows are retained in the data audit. 14 credible-but-unlinked policy row(s) remain internal new-theme monitors, not client-facing constraint evidence.

No policy lead cleared both the company-action and selected-constraint gates. Nothing is promoted from PLI into research-now.

Monitor milestone - named evidence, an unfinished investment leg

Scheme Approved List of Models and Manufacturers (ALMM) for government-supported schemes, including projects from where distribution companies procure electricity for supply to their ALMM consumers. As a major step, the scheme was extended to all the projects under n"	Monitor milestone local policy/product link; verify award terms, capacity, and commissioning

WHO ACTUALLY MAKES THIS? - CONSTRAINT-SCOPED PRODUCER UNIVERSE

Every detected constraint is shown, even when it ranked outside the compact headline shortlist or coverage is incomplete. A direct operating producer needs two non-duplicative dated filings that put the exact product beside manufacturing action and a physical asset. A company with a repeated exact capacity plan or direct product role is shown separately as a pipeline lead-not silently dropped and never treated as an operating maker. The machine automatically promotes strong exact roles, quarantines ambiguous evidence, and rejects buyers, EPC firms, lexical collisions, and unsupported mapper associations. Only the three highest-priority unresolved exceptions are displayed; routine promotion does not require manual research.

Still not a Buy list. Producer proof establishes role; the final decision separately requires a constraint, earnings capture, order conversion, risk, and entry evidence.

Electronic components (broad import exposure) (MEASURED - current as of run date; 0 candidate screen hits; company universe NO_EXACT_COMPANY_CANDIDATES_RECOVERED)

No independently corroborated operating producer recovered. This is a coverage gap, not proof that no producer exists.

Audit: No rejected lexical candidates are shown in the report. Automatic adjudication promoted 0 operating and 0 pipeline name(s), quarantined 0, and rejected 0. Routine promotion does not require manual review.

COMPANY-ORIGINATED PRODUCT DISCOVERIES - UNLINKED RESEARCH QUEUE

These are products recovered from the issuer's own dated filing, not from theme co-occurrence. They are shown precisely because an emerging product chain may be absent from the current constraint crosswalk. **They are not constraints and not Buy candidates.** A product enters the constraint queue only after separate dated import/capacity, demand, and resupply-barrier evidence is captured; an analyst must then review any product-to-chain link. This separation prevents an adjacent product from being silently labelled as a maker of a different bottleneck.

COMPANY	OWN-FILING PRODUCT / ROLE	PRIMARY AS-OF EVIDENCE	REQUIRED NEXT WORK

textiles: Demand-Supply Tension	'textiles' - 16 demand signals vs 1 supply constraints across 14 companies (16 filings). Capex committed: 8.	pre-2020 (data start)	Accelerating	144.6	19	-
cement: Demand-Supply Tension	'cement' - 23 demand signals vs 3 supply constraints across 18 companies (24 filings). Capex committed: 6. High conviction.	pre-2020 (data start)	Accelerating	144.4	25	-
Power: Constraint from ESG Demand	'Power' is supply-constrained (432 bottleneck signals across 57 companies) AND co-mentioned in 61% of 'ESG' documents. Demand from ESG is driving scarcity → pricing power for Power...	02-Sep-2020	Consensus	142.7	20	-
Energy: Constraint from ESG Demand	'Energy' is supply-constrained (320 bottleneck signals across 64 companies) AND co-mentioned in 68% of 'ESG' documents. Demand from ESG is driving scarcity → pricing power for Ener...	03-Sep-2020	Consensus	140.5	20	-
Power: Constraint from Wind Demand	'Power' is supply-constrained (93 bottleneck signals across 61 companies) AND co-mentioned in 83% of 'Wind' documents. Demand from Wind is driving scarcity → pricing power for Powe...	pre-2020 (data start)	Consensus	140.5	26	-
Energy: Constraint from Utilities Demand	'Energy' is supply-constrained (13 bottleneck signals across 13 companies) AND co-mentioned in 63% of 'Utilities' documents. Demand from Utilities is driving scarcity → pricing pow...	pre-2020 (data start)	Consensus	140.5	24	-
data center: Demand-Supply Tension	'data center' - 19 demand signals vs 1 supply constraints across 6 companies (9 filings). Capex committed: 3.	pre-2020 (data start)	Accelerating	140.5	26	-
robotics: Demand-Supply Tension	'robotics' - 25 demand signals vs 2 supply constraints across 14 companies (19 filings). Capex committed: 3. High conviction.	pre-2020 (data start)	Accelerating	140.5	21	-
biotech: Demand-Supply Tension	'biotech' - 17 demand signals vs 3 supply constraints across 10 companies (17 filings). Capex committed: 2. High conviction.	pre-2020 (data start)	Accelerating	140.5	24	-

Bear cases - defense: Demand-Supply Tension

No dominant risk pattern detected from available heuristics - apply sector-specific diligence

Bear cases - textiles: Demand-Supply Tension

Strength score flat for 6 months - theme may have peaked; watch for a re-ignition catalyst before adding

Bear cases - cement: Demand-Supply Tension

No dominant risk pattern detected from available heuristics - apply sector-specific diligence

Bear cases - Power: Constraint from ESG Demand

Fully priced: 20 confirmed quarters at Consensus - marginal buyers shrinking, re-rating requires new catalyst | Rate sensitivity: utilities are bond proxies - if long rates stay elevated, multiple compression offsets load-growth thesis | AI efficiency risk: if model training/inference efficiency improves faster than expected (Jevons paradox), power-demand projections overstated | Interconnection queue: new grid capacity can take 7-12 years to energize; near-term EPS may disappoint vs long thesis

Bear cases - Energy: Constraint from ESG Demand

Fully priced: 20 confirmed quarters at Consensus - marginal buyers shrinking, re-rating requires new catalyst | Rate sensitivity: utilities are bond proxies - if long rates stay elevated, multiple compression offsets load-growth thesis | AI efficiency risk: if model training/inference efficiency improves faster than expected (Jevons paradox), power-demand projections overstated | Interconnection queue: new grid capacity can take 7-12 years to energize; near-term EPS may disappoint vs long thesis

Bear cases - Power: Constraint from Wind Demand

Fully priced: 26 confirmed quarters at Consensus - marginal buyers shrinking, re-rating requires new catalyst | Rate sensitivity: utilities are bond proxies - if long rates stay elevated, multiple compression offsets load-growth thesis | AI efficiency risk: if model training/inference efficiency improves faster than expected (Jevons paradox), power-demand projections overstated | Interconnection queue: new grid capacity can take 7-12 years to energize; near-term EPS may disappoint vs long thesis

Bear cases - Energy: Constraint from Utilities Demand

Fully priced: 24 confirmed quarters at Consensus - marginal buyers shrinking, re-rating requires new catalyst | Strength score flat for 6 months - theme may have peaked; watch for a re-ignition catalyst before adding | Rate sensitivity: utilities are bond proxies - if long rates stay elevated, multiple compression offsets load-growth thesis | AI efficiency risk: if model training/inference efficiency improves faster than expected (Jevons paradox), power-demand projections overstated | Interconnection queue: new grid capacity can take 7-12 years to energize; near-term EPS may disappoint vs long thesis

Bear cases - data center: Demand-Supply Tension

No dominant risk pattern detected from available heuristics - apply sector-specific diligence

2. EMERGING THEMES (12-MONTH WINDOW)

THEME	FIRST DETECTED	PHASE	QTRS	NEW COS	SIGNAL QUALITY
Energy: Constraint from Cement Demand	03-Jun-2021	Consensus	6	76	💧 EXPLOSIVE THEME - 'Energy' is supply-constrained (609 bottleneck signals across 82 companies) AND co-mentioned in 34% of 'Cement' documents. Demand from Cement is driving scarcity → pricing power fo
defense electronics: Constraint from Healthcare Demand	04-Feb-2021	Accelerating	1	72	💧 EXPLOSIVE THEME - 'defense electronics' is supply-constrained (196 bottleneck signals across 132 companies) AND co-mentioned in 31% of 'Healthcare' documents. Demand from Healthcare is driving scarc
Solar: Constraint from Wind Demand	08-Mar-2021	Consensus	21	71	💧 EXPLOSIVE THEME - 'Solar' is supply-constrained (112 bottleneck signals across 62 companies) AND co-mentioned in 33% of 'Wind' documents. Demand from Wind is driving scarcity → pricing power for Sol
Energy: Constraint from Cloud Demand	pre-2020 (data start)	Accelerating	24	68	💧 EXPLOSIVE THEME - 'Energy' is supply-constrained (13 bottleneck signals across 9 companies) AND co-mentioned in 43% of 'Cloud' documents. Demand from Cloud is driving scarcity → pricing power for En
Energy: Constraint from Steel Demand	pre-2020 (data start)	Accelerating	23	62	💧 EXPLOSIVE THEME - 'Energy' is supply-constrained (202 bottleneck signals across 61 companies) AND co-mentioned in 32% of 'Steel' documents. Demand from Steel is driving scarcity → pricing power for
Battery Critical Shortage	05-Oct-2021	Accelerating	16	61	🔴 BOTTLENECK ALERT: 'Battery' - constraint language detected in 43 filings across 26 companies over 4 quarter(s). Weighted constraint score: 72.1. This entity is supply-constrained with explicit manag
no.1: Demand-Supply Tension	01-May-2020	Accelerating	9	60	⚡ Supply-Demand Tension: 'no.1' - 60 demand signals vs 3 supply constraints across 20 companies (68 filings). Capex committed: 13. High conviction.
Power: Constraint from Healthcare Demand	pre-2020 (data start)	Accelerating	24	53	💧 EXPLOSIVE THEME - 'Power' is supply-constrained (15 bottleneck signals across 15 companies) AND co-mentioned in 34% of 'Healthcare' documents. Demand from Healthcare is driving scarcity → pricing po
Energy: Constraint from Healthcare Demand	pre-2020 (data start)	Accelerating	22	47	💧 EXPLOSIVE THEME - 'Energy' is supply-constrained (13 bottleneck signals across 19 companies) AND co-mentioned in 43% of 'Healthcare' documents. Demand from Healthcare is driving scarcity → pricing p
scrutinizer: Demand-Supply Tension	pre-2020 (data start)	Accelerating	1	47	⚡ Supply-Demand Tension: 'scrutinizer' - 15 demand signals vs 3 supply constraints across 26 companies (36 filings). Capex committed: 4. High conviction.
electric vehicle: Demand-Supply Tension	pre-2020 (data start)	Accelerating	14	41	⚡ Supply-Demand Tension: 'electric vehicle' - 95 demand signals vs 15 supply constraints across 37 companies (84 filings). Capex committed: 32. High conviction.
Energy: Constraint from Automotive Demand	pre-2020 (data start)	Accelerating	26	40	💧 EXPLOSIVE THEME - 'Energy' is supply-constrained (13 bottleneck signals across 10 companies) AND co-mentioned in 32% of 'Automotive' documents. Demand from Automotive is driving scarcity → pricing p
Wind Supply Bottleneck	pre-2020 (data start)	Consensus	26	40	🔴 BOTTLENECK ALERT: 'Wind' - constraint language detected in 6 filings across 3 companies over 1 quarter(s). Weighted constraint score: 7.8. This entity is supply-constrained with explicit management
Energy: Constraint from Power Demand	31-Oct-2020	Consensus	26	33	💧 EXPLOSIVE THEME - 'Energy' is supply-constrained (335 bottleneck signals across 296 companies) AND co-mentioned in 30% of 'Power' documents. Demand from Power is driving scarcity → pricing power for
Materials: Constraint from Wind Demand	pre-2020 (data start)	Consensus	26	32	💧 EXPLOSIVE THEME - 'Materials' is supply-constrained (93 bottleneck signals across 30 companies) AND co-mentioned in 36% of 'Wind' documents. Demand from Wind is driving scarcity → pricing power for

Bear cases - Energy: Constraint from Cement Demand

Rate sensitivity: utilities are bond proxies - if long rates stay elevated, multiple compression offsets load-growth thesis | AI efficiency risk: if model training/inference efficiency improves faster than expected (Jevons paradox), power-demand projections overstated | Interconnection queue: new grid capacity can take 7-12 years to energize; near-term EPS may disappoint vs long thesis

Bear cases - defense electronics: Constraint from Healthcare Demand

Strength score flat for 6 months - theme may have peaked; watch for a re-ignition catalyst before adding

Bear cases - Solar: Constraint from Wind Demand

Fully priced: 21 confirmed quarters at Consensus - marginal buyers shrinking, re-rating requires new catalyst

Bear cases - Energy: Constraint from Cloud Demand

Rate sensitivity: utilities are bond proxies - if long rates stay elevated, multiple compression offsets load-growth thesis | AI efficiency risk: if model training/inference efficiency improves faster than expected (Jevons paradox), power-demand projections overstated | Interconnection queue: new grid capacity can take 7-12 years to energize; near-term EPS may disappoint vs long thesis

3. RAW CANDIDATE DIAGNOSTICS - NOT RECOMMENDATIONS

Scoring: fundamental = 0.45×conviction + 0.25×breadth + 0.20×order_book + 0.10×import_sub; composite = fundamental × freshness_multiplier (new_theme ×1.10 | fresh ×1.12 | developing ×1.05 | established ×1.00 | consensus ×0.93). 200DMA → position_size_guidance only, NOT a score input.

5. RAW MAPPING OVERLAP - NOT INDEPENDENT CONSTRAINT PROOF

Overlap is shown only as a data-quality diagnostic. Product-stage duplicates and unverified roles are not treated as corroboration or a structural-chokepoint signal.

TICKER	CHAINS	OVERLAP SCORE	CHAIN DETAIL	READ

6. NEXT RESEARCH STEP

No Core or Early/Timing candidate clears the evidence gates. Use the proof-led and policy research queues to add dated company-product, demand, and risk evidence before re-running the selector.

FORWARD-RETURN VALIDATION - OUTCOME AUDIT, NOT AS-OF EVIDENCE

Separation rule: every theme, constraint, company, role and section assignment above was frozen at 31-Dec-2022. Only the price window looks forward, through 03-Jul-2026. These outcomes measure whether the research machinery surfaced later winners; they do not retroactively grant position authority to a research-only stock.

NO ACTION-AUTHORIZED 2022 COHORT

Investment-committee hand-off and Early / Timing both emitted zero stocks. The returns below therefore validate **research discovery sections only**, not a deployable 2022 portfolio. This is recorded as ALARM_NO_ACTIONABLE_COVERAGE and remains a system-coverage problem.

Section cohorts frozen at the anchor

REPORT SECTION	STOCKS	FROZEN 2022 TICKER COHORT
Investment-committee hand-off	0	No stock emitted
Early / Timing capped starter	0	No stock emitted
Emerging policy research leads - not a Buy	6	HFCL, GENUSPOWER, TATAPOWER, ASTRAMICRO, GVT&D, WEBELSOLAR
Domesticisation / qualification company leads - research only	0	No stock emitted

Cohort forward returns by report section

Each cell shows median return, then mean return and measured/requested coverage. Median is the primary comparison because a single multi-bagger can dominate the mean. The benchmark is an equal-weighted, point-in-time 25-stock trailing-turnover large-cap basket.

Every unique stock surfaced in a visible 2022 section

Returns are price returns from the first tradable close after the anchor to the last close on or before each horizon. Cash dividends and demerger consideration are not included. "Not tradable" means the stock did not have a usable close within 10 calendar days of the anchor; it is never credited to the cohort.

Method and interpretation limits

Selection: frozen selector replay using only evidence dated on or before each anchor

Outcome: NSE EQ price return from first close after anchor to last close on/before each horizon

Tradability: a position is measured only when a close exists within 10 calendar days of both the anchor and horizon; later listings, suspensions, and incomplete histories are excluded

Corporate actions: exchange prev_close discontinuities are chained; when prev_close remains unadjusted on an otherwise impossible ex-date, the opening-auction ratio is used only if the same-day close stays within 25% of open; remaining discontinuities are excluded and retained in position detail

Return type: price return, not total return. Survivorship, section overlap, tiny cohorts and the single 2022 anchor make this a diagnostic, not proof of a repeatable investment strategy.
